

COSTE — Website Photography Brief

For: Media Manager **From:** Web team **Re:** Images required for the COSTE website (coste_sidi_bou) **Goal:** Replace placeholder images with high-quality, on-brand photography sized for crisp display on all screens (including high-resolution "Retina" displays).

1. General standards (please read first)

ITEM	STANDARD
File format	JPG for photos (quality 80–85%). WebP also welcome if you can export it. PNG only for graphics/logos.
Color	sRGB color profile. Natural, warm, Mediterranean tone — avoid heavy filters.
Resolution	Always send the largest original you have. Target pixel sizes below are the <i>minimum</i> for sharpness; bigger is fine, we compress.
File size	Aim under ~500 KB for full-width images, ~250 KB for cards (we can optimize — don't over-compress yourself; send quality originals).
Orientation	Respect the aspect ratio listed for each slot. If the ratio is wrong the image gets cropped automatically and may cut off heads/plates.

ITEM	STANDARD
Composition	Keep the main subject centered or slightly high . The site adds dark gradients at the bottom of many cards and text on the bottom-left of the hero — leave that area calmer.
Naming	Use clear names, e.g. <code>hero-terrace.jpg</code> , <code>exp-brunch.jpg</code> , <code>event-2026-07-12-jazz.jpg</code> .
Rights	Confirm we own / are licensed for each image (especially the "Nearby" tourist shots).

Aspect ratio cheat: 16:9 = wide landscape · 4:3 = standard landscape · 3:4 & 4:5 = portrait · 1:1 = square · 21:9 = ultra-wide banner.

2. HERO — the first thing visitors see (1 image)

	Must look great very large and full-bleed.	(covers full screen)	x	x
			1350	1440

⚠ This is the most important image. Bottom-left carries the headline text, so keep that corner less busy.
